## Micro Power Monitor GM86 GM87

### Application cases

1. When selling various kinds of energy-saving appliances, power metering function can be used to demonstrate energy saving situation of electrical appliances for users.
2. For normal users, use power/ electric quantity metering functions to test various working conditions of domestic electrical appliances (refrigerator, air conditioner, washing machine, computer, fan, energy-saving lamp, etc.) to clearly know power consumption situation of each electrical appliance to better guide users to use electricity.
3. One can find that it can timely eliminate risks due to power abnormality caused by appliance electricity leakage by testing working power of domestic appliances and comparing with marked power of appliances.

### LCD display and keys

### Specification

Applicable power supply	220V 50Hz
Working voltage range	180.0V~260.0V
Maximum rated current	10A (GM86) / 1A (GM87)
Maximum power	2200W
Measurable range	0.2W~2200W
Maximum accumulated electric quantity	99999KWh
Maximum accumulated time	99999minutes
Power factor	0.001-1.000
Backlight function	ON/OFF can be set
Precision	Level 1.0
Constant	6400imp/kWh
Power dissipation	<1W
Working temperature	0~45°C
Storage temperature	-20~60°C
Product dimension	60.0*55.7*120mm
Weight	129.6g
