

Jenco, 3177K10 Liquid Resistant Benchtop Conductivity/TDS

The Basis Series Conductivity/TDS/Salinity benchtop is the latest entry-level Meter from a line that is renowned for its reading quality, now with a refined user experience and improved usability

Features with all optional accessories:"

- Renowned accuracy and repeatability
- Upgraded user experience and usability
- Low cost of ownership
- Repeatable readings with $\pm 0.5\%$ full scale accurate across entire measurement range
- Each and every unit is hand calibrated and QC'ed by at least 2 teams
- Simple one point calibration
- Streamlined, modern and smaller design creates clutter-free workspace
- Large, high contrast LCD
- Convenient one point calibration
- Automatically determines the best conductivity ranges to display readings
- Well-situated keys with tactile feedback
- Splash-resistant case made with durable, reinforced plastic for added protection
- AC adaptor or battery powered
- Splash-resistant case is made with durable, reinforced plastic for added protection
- 8-pin DIN connector for conductivity cell & 10k thermistor
- Optional, detached electrode arm
